Lil' Corky Cluster Makes Debut At ICAST

Granger, WA – Worden's iconic Lil' Corky has been joined by the newly developed Lil' Corky Cluster, a buoyant imitation egg cluster primarily intended for salmon, steelhead and trout fishing in streams and rivers. The Lil' Corky Cluster, or "Corky Cluster" as it's being called by anglers, comes in three sizes and 30 different UV finishes.

Buzz Ramsey, Yakima Bait Company Brand Manager shared, "There's been a demand for this type of buoyant body, and we've spent the time necessary to produce an exceptional lure. From the first time we fished them we knew we had a winner. The colors we settled on and sizes are all matched to salmon, steelhead and trout".

Just like the Lil' Corky, Lil' Corky Clusters can be fished with or without bait. The three sizes that are available are #7 (9/16ths diameter), #9 (7/16ths diameter), #11 (11/32nds diameter). Lil' Corky Clusters are packaged in quantities of 10, 25 and 100 pieces.
