

FlatFish Package Instructions F-7 to T-4

FlatFish is a shallow to medium diving plug designed to catch a wide variety of game fish. This lure produces a wide, strike-producing wiggle when trolled, back trolled or reeled at slow (slow is good with FlatFish) to medium speed. For best result, tie your line to the round-eyed connector snap or figure-eight eyelet provided with lure. A barrel swivel can relieve line twist associated with spinning reel use and should be placed from two to four feet ahead of lure.

LAKES

FlatFish can be trolled on a flat line (no weight added) near the surface, which can be effective when cloudy or during low-light conditions. When fish are running deeper add weight (split shot, trolling sinker or bottom walker) 36-to-60 inches ahead of lure. Leaded line, with 6-to-8 foot monofilament or fluorocarbon leader, can also be used to take FlatFish to fish-holding level. When used in conjunction with downrigger, try running your FlatFish 20-to-30 feet behind downrigger release.

RIVERS

FlatFish can be cast cross current and allowed to swing through fish-holding water. From a boat, FlatFish can be trolled, still fished (by anchoring and using river current to work lure) or back-trolled (troll FlatFish behind boat while backing boat downriver slower than river current).

ADD SCENT, TIP OR ADD FILLET OF BAITFISH TO LURE

You can make FlatFish even more effective by adding scent to your lure or tipping one prong of treble hook with maggot, leech or worm. Prepared baits work for tipping too.

FlatFish: Available in 15 sizes ranging from 1-to-6 inches.
